# Index Wireframe

# Portfolio Wireframe

# Blog Wireframe

# Contact Wireframe

The image displays three wireframe designs for a contact page, arranged from left to right: mobile, tablet, and desktop.

**Mobile Wireframe (Left):** Features a top navigation bar with links: Home, Portfolio, Blog, Contact, and Socials. Below the navigation bar is a contact form titled "CONTACT FORM" with fields for First Name, Last Name, Email Address, Contact Number, and a Message field. A "Submit" button is located at the bottom of the form. The footer contains the text "Copyright".

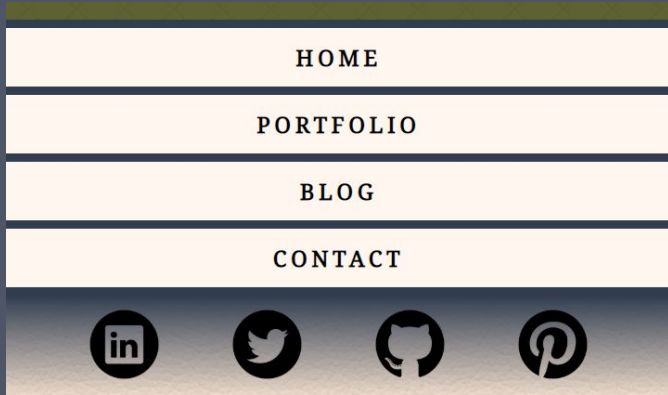

**Tablet Wireframe (Middle):** Features a top navigation bar with links: Home, Portfolio, Blog, Contact, and Socials. Below the navigation bar is a contact form titled "CONTACT FORM" with fields for First Name, Last Name, Email Address, Contact Number, and a Message field. A "Submit" button is located at the bottom of the form. The footer contains the text "Copyright".

**Desktop Wireframe (Right):** Features a top navigation bar with links: Home, Portfolio, Blog, Contact, and Socials. Below the navigation bar is a contact form titled "CONTACT FORM" with fields for First Name, Last Name, Email Address, Contact Number, and a Message field. A "Submit" button is located at the bottom of the form. The footer contains the text "Copyright". To the right of the contact form is a social media section with links: Linked In, Twitter, Github, and Pintrest.

# Index Features

I am always looking to improve.

I'm a developer and website designer in Brisbane, Australia, who aspires to pave the way for the careers of myself and other women in the technology industry. Currently, I am studying at Coder Academy but I am always wanting to develop new skillsets or expand on existing ones.

I am always looking to improve.

I'm a developer and website designer in Brisbane, Australia, who aspires to pave the way for the careers of myself and other women in the technology industry. Currently, I am studying at Coder Academy but I am always wanting to develop new skillsets or expand on existing ones.

My values define me.

## COMMUNICATION

Communication is essential to success and happiness and learning to do so effectively is one of the most important skills we can learn. I believe that with efficient communication, good listening and compassion, I can create great connections with others.

## PASSION

Passion is what drives me the most. Without it, there is little left as motivation. When I'm able to channel my passions, I work effectively, incredibly hard and with focus. One of my greatest passions is learning; which is why I thrive in an ever-changing industry.

My values define me.

## PASSION

Passion is what drives me the most. Without it, there is little left as motivation. When I'm able to channel my passions, I work effectively, incredibly hard and with focus.

## OPTIMISM

By nature I am a very optimistic person. I look at the glass half full and the day full of opportunity. With that outlook itself, comes the chance for development both

## HONESTY

Effective communication is not truly achievable without honesty. It's one of my four core values that encapsulates the other three.

### Plant Sim Ruby Application

For my first assessment studying at Coder Academy, we were required to develop an application using the Ruby programming language. I chose to develop a plant simulation game because of my love for plants and tamagotchi-like simulations.

The game provides you with a virtual plant to care for and will eventually either grow into a beautiful sunflower, or wither and die, depending on how well you meet its needs.
